Ahmedabad, Gujarat, India

Professional Summary

MCA candidate and AWS Certified Cloud Practitioner with hands-on project experience across Android (Java), Python, and Odoo/ERP development. Comfortable shipping working software solo, including AI-assisted development workflows, and has a merged pull request on a third-party open-source project. Seeking an entry-level Applied AI/ML, Android, cloud, or backend role.

Education

Master of Computer Applications (MCA) Swarnim Startup & Innovation University 2025 - 2027 (expected)

Currently pursuing (Semester 3 of 4), Current SPI 9.01

Bachelor of Computer Applications (BCA) S K Patel Institute of Management & Computer Studies (Bhola Bhai Patel Department of Computer Applications) Aug 2021 - Mar 2024

SPI 8.67

Projects

Odoo MCP Gateway

Built an Odoo 18 module implementing a real Model Context Protocol (MCP) server and client (JSON-RPC 2.0, tools/list, tools/call) exposing Odoo's tools to AI clients, plus a 6-provider LLM integration layer (Anthropic, OpenAI, Gemini, Ollama, Grok, OpenCode) with zero extra dependencies, rate-limited access control, and session cost/token audit tracking. Built a dedicated in-Odoo chat interface so the agent could render interactive charts inline via a separate, tightly-coupled chart-generation tool. Directed an AI-assisted build; working knowledge of the architecture rather than deep mastery of every internal.

Python, Odoo 18, MCP (JSON-RPC 2.0), OWL 3

AI Call Center (Odoo 19 module)

Built an Odoo 19 module giving Odoo a real AI customer-service/sales agent for WhatsApp and Live Chat, answering from a self-built semantic search knowledge base (chunked docs, embeddings via local ONNX or an external API, stored in Odoo's own PostgreSQL, matched with custom cosine-similarity + keyword scoring) and automatically drafting Sales Quotations or Helpdesk Tickets. Async queue-and-cron pipeline keeps LLM calls off the web request thread. Backed by a 30+ file automated test suite. Directed an AI-assisted build using the AI Second Brain framework.

Python, Odoo 19, PostgreSQL, ONNX embeddings

AI Second Brain (agent framework template)

Built a portable, zero-dependency framework for AI coding agents (Claude Code, Cursor): self-healing error-fix-log-retry loop, SAFE-style dev-loop agent roles, a reusable 14+ skill library, and persistent cross-session memory. Used this framework's dev loop to build the Odoo MCP Gateway and AI Call Center projects above. Published as a sanitized MIT-licensed public template with cross-platform CI smoke tests (Linux/macOS/Windows).

Node.js, npx, GitHub Actions

Torchit NavScan (BLE Prototype)

Built an Android app scanning for and listing nearby Bluetooth Low Energy assistive hardware in real time as a hardware diagnostic companion tool. Handled Android 12+ BLE runtime permissions and added full TalkBack accessibility support on every interactive view, with a simulated-device fallback for testing without physical hardware.

Java, Android BLE APIs

Jarvis Voice Assistant

Built a Python voice assistant with wake-word detection, speech-to-text, and text-to-speech, falling back to an LLM (Groq API, Llama 3.3 70B) for open-ended questions when a command doesn't match a known action. Includes command routing for websites, music, and live news headlines.

Python, Groq API (Llama 3.3 70B), gTTS

Merged open-source PR - odoo-snippets

Fixed a syntax error in a TransientModel snippet and improved the regex logic so the generated class name capitalizes correctly. PR #15, merged into mstuttgart/odoo-snippets (third-party VS Code extension for Odoo snippets).

VS Code extension, regex

Skills

Cloud: AWS (Lambda, IAM, EC2, S3, Cloud Computing Fundamentals)
Languages: Python (NumPy, Pandas, Matplotlib basics), Java, PHP, C, Bash (basic scripting), HTML5, CSS3
DevOps: CI/CD (GitHub Actions), Docker, Kubernetes, pre-commit
Frameworks/Platforms: Android (BLE APIs), Odoo (ORM, AI-assisted), FastAPI **Data:** MySQL (basic database management)
Tools: Git/GitHub, Linux (basic command-line), Microsoft Excel

Certifications

AWS Certified Cloud Practitioner	Amazon Web Services	Issued Jun 2025, expires Jun 2028
